

***MONITORING PROCEDURE
FOR THE ACCREDITATION OF FOREIGN TRAINING SITES
INVOLVED IN HUNGARIAN MEDICAL EDUCATION
2010/2011***

HAC RESOLUTION 2011/1/VIII

***AKKREDITATION REPORT ON THE
KONKUK UNIVERSITY MEDICAL CENTER (Szöul, Korea)
and
CHUNGNAM NATIONAL UNIVERSITY HOSPITAL (Daejeon, Korea)
as medical training sites in Korea for Hungarian medical education***

Chair of the visiting team:

Dr. Róbert Póka, professor

University of Debrecen, Medical and Health Science
Center, Obstetrics and Gynecology Clinic

Members:

Dr. György Panyi, professor

University of Debrecen, Medical and Health Science
Center, Department of Biophysics and Cell Biology

Dr. Attila Jenei, associate professor

University of Debrecen, Medical and Health Science
Center, head of Center for International Education

Dr. Yun Saeng Lee, section chief

Daegok Woori Union Pediatric Clinic, Korea

The site visit took place on: **December 5-10, 2010**

January 25, 2011

The visiting team, composed in accordance with the regulations set down in **HAC Resolution 2010/10/VI** and under consideration of the accreditation criteria set down in said resolution, has conducted a site visit to the training sites. In the visit, the team inspected those wards that conduct medical care in the areas in which sixth-year students receive training: *internal medicine; surgery; neurology; psychiatry; obstetrics and gynecology; and pediatrics*. The training program was discussed with the heads of the wards as well as the head of the hospital.

I.

Konkuk University Medical Center	Accreditation decision
	HAC RESOLUTION 2011/1/VIII A On condition that the accreditation criteria continue to be met throughout, the accreditation of the hospital training site is granted until December 31, 2015. Over one third of the hospital units have been accredited, therefore the hospital is granted the title of Accredited Teaching Hospital .

Compliance with the accreditation requirements:

1. Konkuk University Medical Center is an **accredited training center in Korea**, which participates in the education of medical students.
2. Konkuk University Medical Center, more specifically the departments being the subjects of this review, **filled out the accreditation questionnaire**, on the basis of which it becomes clear that this is an **institution with a large number of patients** and where **highly qualified physicians conduct medical practice**. The details, regarding number of beds, doctors, etc., can be found in the filled-out questionnaires.
3. In the interviews with the heads of the hospital wards it became evident that they, and the physicians under their charge, are **regularly involved in medical student training** and that the **hospital has its own resident-training program** in which the heads of the six main clinical subjects participate. The HAC was also able to conclude that the heads of the wards are **physicians who are renowned in Korea** and therefore the quality of the training cannot be questioned. **Each ward or department has over three specialists** as well.
4. In the six fields the academic requirements and list of competences required for the diploma have been agreed on with the heads of the institutes and the HAC concurs that the **hospital is able to ensure the fulfillment of the requirements** set down in the documents.
5. For the examination of the infrastructure of the training the expert team visiting the sites reviewed not just the wards but also the diagnostic departments and also examined the phantom-simulation center of the hospital in detail. The facilities **fulfill the requirements** and is even of particularly high quality, and the variety and volume of diagnostic equipment is overwhelming (e.g. the gastroenterology laboratory lines up twelve examination rooms, each with the most modern fiber-optic equipment). The hospital's simulation center in the hospital **testifies of the high quality of training**.
6. Based on the site visit, accreditation may be granted to the following units at *Konkuk University Medical Center*:
 - a. **internal medicine**
 - b. **surgery**
 - c. **neurology**
 - d. **psychiatry**
 - e. **obstetrics and gynecology**
 - f. **pediatrics**

Based on the above the requirement that **at least one third of the departments should be accredited** is fulfilled, therefore the institution is awarded the title of **accredited teaching hospital**.

II.

Chungnam National University Hospital	Accreditation decision
	HAC RESOLUTION 2011/1/VIII A On condition that the accreditation criteria continue to be met throughout, the accreditation of the hospital training site is granted until December 31, 2015. Over one third of the hospital units have been accredited, therefore the hospital is granted the title of Accredited Teaching Hospital.

Compliance with the accreditation requirements:

1. Chungnam National University Hospital is an **accredited training center in Korea**, which participates in the education of medical students.
2. Chungnam National University Hospital, more specifically the departments being the subjects of this review, **filled out the accreditation questionnaire**, on the basis of which it becomes clear that this is an **institution with a large number of patients** and where **highly qualified physicians conduct medical practice**. The details, regarding number of beds, doctors, etc., can be found in the filled-out questionnaires.
3. In the interviews with the heads of the hospital wards it became evident that they, and the physicians under their charge, are **regularly involved in medical student training** and that the **hospital has its own resident-training program** in which the heads of the six main clinical subjects participate.
